

Summary sheet | 2011 National Cycling Participation Survey

Queensland Cycling Participation

Queensland cycling participation is similar to the Australian average.

Around 18% of Queensland residents ride in a typical week, increasing to 26% in a month and 39% over a year.

More than half of all children aged under 10 ride each week. But only 8% of people aged 40 and over ride in a typical week.

Men and boys are more likely than women and girls to ride. About 23% of males and 12% of females ride in a typical week. The lowest rate of participation is by older women with just 4% of women aged 40 and over cycling in a typical week.

Most people ride a bicycle for recreation. But Queensland has one of the higher proportions of people who cycle for transport (40% of people who cycle in a typical week). About 275,000 people cycle for transport on at least one occasion a week.

Close to 60% of households in Queensland have access to a bicycle.
